

CIT Bank Systems Upgrade: **Online banking**

Banking online is getting better.

We're excited to announce upcoming enhancements to our CIT Bank online banking system during the second quarter of 2016. For our customers, a new system means increased security, a better interface, and the ability for CIT Bank to provide advanced features as well as easier upgrades. New and existing customers will benefit from a new and improved online account opening. Over the next few months, we will communicate more detailed announcements about our new enhancements.

Important: Keep your contact information up-to-date, especially your mobile number as it is the easiest way to authenticate your security credentials.
